-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Molitor et al. US 4,650,193 taken alone or in view of either one of Hamada et al. US 4,929,678 or Kakiuchi et al. US 4,683,257.

Molitor et al. US 4,650,193 teaches golf ball compositions which are based upon high cis polybutadiene, see column 3 lines 16+. The incorporation of the claimed peroxide, co-crosslinker and fatty acid is shown at column 4 lines 26-36. The incorporation of fillers is disclosed at column 3 lines 43+. The difference between the claimed composition and that claimed is the polybutadiene is not expressly stated as being formed with a lanthanide containing catalyst. The polybutadiene suggested in the patent is not identified as being formed using any particular catalyst. As such, the art is

Art Unit: 1713

seen to be generic to the claimed polybutadiene. The selection of a polybutadiene being formed with a lanthanide catalyst is considered obvious. The secondary references art supplied as showing the use of the claimed polybutadiene. It would be obvious to select the polybutadiene shown in the secondary references given that it is shown to be useful in the compositions of the primary reference.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.
